

R.J. OLIVER

Henrico, VA 23223 | 434-825-9689 | toppnotchproductions@gmail.com | linkedin.com/in/rafael-oliver-17b59628

Senior Web Developer / UI-UX Designer • Graphic Design • Sales • People Management & Training

Active Security Clearance

PROFESSIONAL SUMMARY

Versatile professional with years of experience spanning Senior Web Development & UI/UX Design, Graphic Design, and — earlier in career — Sales and People Management & Training. Deep expertise in Agile/Kanban workflows, Angular, Flutter, React, and headless CMS architectures, paired with a strong foundation in visual/brand design built through years as a graphic designer, and in client relations and team leadership carried over from earlier roles in sales and program management. Proven track record of leading cross-functional projects, mentoring offshore and internal teams, and translating complex design mockups into production-ready, ADA-compliant components across enterprise, government, and startup environments.

Hands-on experience managing Digital Asset Management (DAM) systems, brand books (style guides), creative libraries, and existing campaign materials to build digital deliverables. Strong understanding of brand governance, asset reuse, and adaptation workflows across email, web, landing pages, and digital activation channels. Proficient in Adobe XD and Figma.

SENIOR WEB DEVELOPMENT & DESIGN EXPERIENCE

SmallBizNiz LLC

2015 – Present

Freelance — Custom Graphics, Web Design and Development for small businesses, churches and non-profit organizations

- Custom WordPress Websites, including custom plugins, metaboxes, and more utilizing WP-JSON, ACF, JS, HTML, PHP
- Website security management with Sucuri and other security plugins for blacklisting IPs and hardening
- Manual WordPress backups and migrations from host to host
- WordPress theme updates and optimization — removing spam comments, old plugins, and other items causing latency
- Uses Adobe CC for design software (Photoshop, Illustrator, XD, Firefly, etc.)
- Deploys and hosts modern web projects using AWS (S3, SES) and Vercel

Frendigo

Jan 2026 – Present

Senior Lead Developer

Remote

- Architecting and building a 3-platform transportation marketplace SaaS (iOS, Android, web) using Flutter and Angular
- Developing Angular-based marketing, operations, partner, and training sites with Firebase backend and Google Maps API integration
- Implementing a subscription-based pricing engine (MPG, USDOT, EIA gas data) replacing per-trip commissions
- Managing full Agile sprint cycles, GitHub version control, and CI/CD pipelines
- Leveraging AI-assisted vibe coding to accelerate development of Flutter and Angular apps — using AI tools to scaffold components, debug logic, and rapidly iterate across the full stack
- Utilizing Node.js for backend services and AWS (S3, SES) for cloud storage and transactional email delivery

Battelle

Feb 2024 – Dec 2025

Senior Web Developer, CTR DHA Public Health (USA)

Remote

- Security Clearance Holder; led custom WordPress development (PHP, Laravel, WP-JSON REST API) for the Navy and Marine Corps Force Health Protection Command (NMCFHPC), shipping numerous interactive health-education pages with custom SVG animations and dashboards
- Managed Digital Asset Management (DAM), brand style guide (brand book) governance, and creative library organization for the Warfighter Wellness initiative, building landing pages from reusable, brand-compliant components and existing campaign materials
- Built reusable component libraries, custom post types, and bespoke jQuery/CSS3/HTML5 solutions for research and government-facing web properties
- Translated text-based requirements and Adobe Photoshop/Illustrator/XD mockups into functional, interactive components for content teams
- Managed and tracked tasks using SharePoint

Shades of Light

Nov 2023 (30-Day Contract)

Senior Web Developer

Richmond, VA

- Short-term front-end development engagement taken on while awaiting security clearance processing ahead of the Battelle role
- Worked in an Agile environment on a headless e-commerce website, integrating Algolia Search and Google Commerce
- Referenced Digital Asset Management (DAM) systems, brand style guides, and creative libraries to build and launch on-brand landing pages
- Used LogRocket for session monitoring and debugging
- Managed tasks and collaborated with the offshore development team at ChangeCX via JIRA
- Reviewed and implemented monthly SEO recommendations provided by a third-party agency

Virginia Commonwealth University

Dec 2019 – Oct 2023

Senior Digital Developer

Richmond, VA

- Led custom web development on Terminal Four (Java-based enterprise CMS) for multiple schools and organizations across the university — including the School of Dentistry, School of Business, the President's Office, Admissions, and Marketing & Communications — serving VCU's flagship web presence
- Maintained Digital Asset Management (DAM) systems, brand style guides, and creative libraries to support consistent landing page and email development across university schools and departments
- Authored reusable vanilla JS components and JSON-driven dynamic directories, eliminating reliance on third-party scripts
- Translated Adobe XD/Photoshop mockups into pixel-perfect, ADA-compliant functional components and custom content types
- Designed and deployed custom LISTSERV Maestro HTML email templates and managed email marketing campaigns
- Operated in an Agile team environment with iterative sprint planning, peer review, and stakeholder UAT cycles, using JIRA to track tasks and bugs

VitaminT (VCU Contract)

Aug 2019 – Dec 2019

Senior Front-End Developer

Richmond, VA

- Delivered custom front-end development for internal and external VCU college web initiatives
- Bridged design and development by rapidly converting wireframes into responsive, cross-browser compatible components

Allianz Partners

Dec 2018 – Aug 2019

Senior Front-End Developer

Richmond, VA

- Developed, optimized, and supported travel insurance offer widgets deployed across 20+ partner sites including Delta, Amtrak, Hotwire, Priceline, Hawaiian Airlines, Hilton, and Alaska Airlines
- Referenced brand style guides and creative libraries to build landing pages and HTML email campaigns supporting travel insurance offer widgets
- Built and A/B tested front-end designs on an Angular platform to maximize conversion for travel insurance products
- Integrated Node.js-based services to support Angular platform functionality
- Operated in an Agile environment with rapid iteration cycles driven by partner analytics and business KPIs, using JIRA to track and complete tasks

Lumber Liquidators

Dec 2015 – Dec 2018

Front-End Developer & UI/UX Designer

Toano, VA

- Hired to lead a full responsive redesign and ADA compliance overhaul of lumberliquidators.com, cutting reliance on third-party providers
- Worked in a Kanban environment on a Java-based platform; edited JSP templates to make the entire site — including checkout — fully responsive
- Designed and developed UX/UI for the Product Availability modal, enabling ZIP/city/state-based inventory search
- Redesigned and launched the new Product Page, featuring a fresh UX and multi-media gallery
- Built a proprietary HTML/JS Page Builder web application used by content teams for self-serve publishing
- Implemented a Mega Dropdown desktop navigation that doubles as an off-canvas drill-down menu on mobile

Genworth Financial (via Techead)

Jul 2014 – Dec 2015

Senior Content Manager / Front-End Developer

Richmond, VA

- Managed and developed content for genworth.com and the PRO Agent portal using Adobe CQ5 (now AEM), a Java-based enterprise platform
- Maintained Digital Asset Management (DAM), brand style guides, and creative libraries to ensure consistent, on-brand content across genworth.com and the PRO Agent portal

- Built custom AEM components and interactive JavaScript elements, most notably the award-recognized R70 Age Suit infographic
- Led front-end development to upgrade Genworth's Long Term Care site to a fully responsive experience
- Built pages from provided wireframes; tested across all browsers, then facilitated UAT; troubleshoot cross-browser issues stemming from HTML/CSS markup
- Tagged content for tracking metrics using Eloqua and for SEO using Schema, OG meta tags, metadata, and canonicals

Ayers Electronic Systems (via ApGility)

Dec 2014

Front-End Developer (Contract)

North Chesterfield, VA

- Built a custom CMS for client AAR (Association of American Railroads) using CakePHP, Bootstrap, and Semantic UI within an Agile framework
- Created HTML email templates and website wireframes; built out approved designs using HTML, CSS, and jQuery

Capital One (via Celerity)

Nov 2013 – Jul 2014

Web Content Manager (Full-Time Contractor)

Glen Allen, VA

- Managed Digital Asset Management (DAM), brand style guides, and creative libraries to ensure consistent, on-brand content across acquired accounts
- Processed content using ContentOne and SharePoint Teamsite; deployed content to QA and PROD for 9 Agile teams during EOS replatforming
- Managed content owned by partners of Capital One's acquisition of HSBC accounts, including Menards, Polaris, Guitar Center, and Best Buy
- Maintained HTML for microsites using Adobe Dreamweaver; managed .properties, .xml, .metadata, images, .html, .css, and .js files
- Managed and tracked tasks using SharePoint

Media General (MGFX)

Jun 2012 – Dec 2013

Graphic Artist (started as Graphic Design Intern, Jun 2012)

Glen Allen, VA

- Produced graphics for 20+ TV stations using Adobe CS6 (Photoshop, Illustrator, After Effects)
- Maintained Digital Asset Management (DAM), brand style guides, and creative libraries across on-air graphics packages for 20+ TV stations
- Created 3D broadcast animations using Cinema 4D and animated satellite maps using Treo Maps

Royall & Company

Nov 2012 – Feb 2013

Email Project Manager (4-Month Contract)

Richmond, VA

- Referenced brand style guides (brand books) and creative libraries to build landing pages and email campaigns
- QA/tested HTML email campaigns for best practices, design standards, and link integrity
- Coordinated resolution of issues between copywriters, account managers, and web designers
